Relyon Beds

Renowned for creating the best beds in the world, Relyon has a reputation that has been earned and protected for over 150 years. Relyon not only makes the best beds but it also assures years of wonderful, restful nights' sleep for every customer.

Relyon's reputation for excellence of quality and design extends way beyond its traditional beds to encompass all its product ranges including guest beds and upholstered headboards.

At very first glance, a Relyon bed evokes a truly sensory experience. First you see the quality of its design and meticulous attention to detail, and then you feel its sumptuous comfort and luxurious support. Relyon mattresses combine traditional skills with some of the world's finest materials to create an outstanding choice of handmade products.

Natural fillings are the key ingredient in making the most sumptuous mattress. Relyon really knows and understands natural fibres as the company began life in 1858 as a wool merchant in the Somerset town of Wellington.

Relyon has its own spring manufacturing company on site, as well as its own wood mill. In addition, Relyon is the only bed manufacturer to have its own in-house

laboratory, which systematically tests all raw materials to ensure that these are in accordance with product specifications and achieve European standards.

If you look inside a Relyon mattress you will see sumptuous layers of the finest quality fillings, specially chosen and expertly blended to provide the perfect sleeping experience. Using differing spring counts and combinations of fillings results in mattresses of varying firmness and "feel" that will respond perfectly to an individual's size, shape and weight, offering unsurpassed levels of comfort and support.

What shall I do next?

In addition to the wonderful beds and mattresses that you can see and experience at Le Bourg7, British Beds Worldwide can supply and deliver any model from the current Hypnos and Relyon ranges into your bedroom almost anywhere in the World.

Most mattresses within these ranges are upholstered with all-natural fibres such as lambswool, mohair, cashmere, silk, cotton, merino wool, bamboo, alpaca hair, horse hair or hogs hair. All these fillings have been carefully selected down through generations for their sleep-improving properties, such as softness or resilience or the ability to wick away moisture. Sleeping on such natural properties is, as you may have found here at Le Bourg 7, a wonderful experience that memory and other foams simply cannot replicate. Other lower-specification models for spare rooms, gites or lower-budget guest-houses, for example, are also available but minimum quantities may apply.

For your opportunity to enjoy the rest of your life on one of the best and most comfortable beds and mattresses in the world, you can browse and enquire through our website: www.britishbedsworldwide.com. (Don't forget to mention your stay at Le Bourg 7 when enquiring).
